

# HTML SITE - ONE PAGE RETRO PORTFOLIO

## USER GUIDE

Thank you for choosing our product, you purchased a carefully crafted template. If you are not satisfied or face a problem, please let us know. Best is to write it down at the comment section for this item. We always try to help and improve our items.

**Enjoy and good luck with your project!**

## TABLE OF CONTENTS

1. Fonts you need to edit the .psd
2. Edit the header names
3. Setup the skills diagrams
4. Setup the Nivo Slider
5. Customize the Portfolio
6. Setup the e-mail form
7. Setup social links
8. Scripts and other sources

## 1. FONTS YOU NEED TO EDIT THE .PSD

Download the fonts from below and install them before opening your application.

- Socialico Icons by Jelio Dimitrov, downloadable from [fontfabric](#)
- Yesteryear by Astigmatic One Eye Typographic Institute, downloadable from [google](#)
- Yanone Kaffesatz font by Yanone, donwloadable from [google](#)

- Consider to make a donation to the authors of the fonts, there deserve it!
- Sometimes a system font is missing, use google to find a substitute or the lost original.

## 2. EDIT THE HEADER NAMES

To change the header names (top menu) edit the marked lines accordingly:

```
88      <!-- ..... HEADER ..... -->
89
90      ..... -->
91      <div id="header" >
92          <ul >
93              <li id="nav_1" ><a href="#jump1" ><span id="eins" onclick="satzRot(0);">about me</span></a></li>
94              <li><a href="#jump2" ><span id="zwei" onclick="satzRot(1);">portfolio</span></a></li>
95              <li><a href="#jump3" ><span class="logo">Dreamland</span></a></li>
96              <li><a href="#jump4" class="nav_right" ><span id="drei" onclick="satzRot(3);">features</span></a></li>
97              <li><a href="#jump4" ><span id="vier" onclick="satzRot(4);">contact</span></a></li>
98          </ul>
99      </div> <!-- END OF HEADER -->
```

To change the section names edit the marked lines accordingly.

Welcome:

```
106      <!-- ..... Content Section: Welcome ..... -->
107
108      ..... -->
109      <div id="welcome">
110          <span id="jump2" ></span>
111          <div class="head" >
112              <h5>Welcome</h5>
113          </div>
114          <div class="middle" >
115              <div id="frame_slide">
```

About me:

```
140      <!-- ..... Content Section: About Me ..... -->
141
142      ..... -->
143      <div id="aboutme">
144          <span id="jump1" ></span>
145          <div class="head">
146              <h5>About Me</h5>
147          </div>
148          <div class="middle" >
```

Portfolio:

```
233      <!-- ..... Content Section: Portfolio ..... -->
234
235      ..... -->
236      <div id="portfolio">
237          <span id="jump2" ></span>
238          <div class="head">
239              <h5>Portfolio</h5>
240          </div>
```

Features:

```
326      <!-- ..... Content Section: Features ..... -->
327
328      ..... -->
329      <div id="features">
330          <span id="jump3" ></span>
331          <div class="head">
332              <h5>Features</h5>
333          </div>
```

Contact:

```
381      <!-- ..... Content Section: Contact ..... -->
382
383      ..... -->
384      <div id="contact">
385          <span id="jump4" ></span>
386          <div class="head">
387              <h5>Contact</h5>
388          </div>
```

### 3. SETUP THE SKILLS DIAGRAMS

The skill diagrams are images, there are going from 50% to 100% in 10% steps. If you want to be your skill level at 90% you have to change the image source to **images/skills\_90.png** and the number itself (two lines below).

```
189 <!-- ..... Skill Function ..... -->
190 <div id="skills" style="height:170px; margin-top:30px; margin-left:-10px;">
191   <div id="skill_1" style="float:left">
192     
193     <h4>Photoshop</h4>
194     <h6>50%</h6>
195   </div>
196   <div id="skill_2" style="float:left">
197     
198     <h4>Javascript</h4>
199     <h6>60%</h6>
200   </div>
201   <div id="skill_3" style="float:left">
202     
203     <h4>html</h4>
204     <h6>70%</h6>
205   </div>
206   <div id="skill_4" style="float:left">
207     
208     <h4>Illustrator</h4>
209     <h6>80%</h6>
210   </div>
211   <div id="skill_5" style="float:left">
212     
213     <h4>jQuery</h4>
214     <h6>90%</h6>
215   </div>
216   <div id="skill_6" style="float:left">
217     
218     <h4>Wordpress</h4>
219     <h6>100%</h6>
220   </div>
221 </div>
222 <!-- ..... End Skill Function ..... -->
```

You can adjust the speed of the fadeIn effect here:

```
52
53
54   if ( myPosY > 501 ) {
55     $("#skill_1").fadeIn(3000);
56     $("#skill_2").fadeIn(2500);
57     $("#skill_3").fadeIn(2000);
58     $("#skill_4").fadeIn(1500);
59     $("#skill_5").fadeIn(1000);
60     $("#skill_6").fadeIn(500);
61   }
62   });
63 </script>
64
```

## 4. SETUP THE NIVO SLIDER

You can add as many images you like (can increase the loading time). The default image size for the Nivo slider is **900px x 330px**.

You find them under the path: **images/gallery/slider1.jpg, slider2...**

```
118
119
120 <!-- ..... Slider ..... -->
121 <div class="slider-wrapper theme-default">
122   <div id="slider" class="nivoSlider">
123     
127     
129   <div id="htmlcaption" class="nivo-html-caption">
130     <strong>This</strong> is an example of a <em>HTML</em> caption with <a href="http://www.anders.denkend.net">a
131   </div>
132 </div>
133 <!-- ..... end Slider ..... -->
```

Change the caption title here:

```
..... -->
theme-default">
:nivoSlider">
lly/slider1.jpg" data-thumb="images/gallery/slider1.jpg" alt="" title="Andersdenkend presents" />
lly/slider4.jpg" data-thumb="images/gallery/slider4.jpg" alt="" title="Dreamland - One Page Portfolio" />
lly/slider2.jpg" data-thumb="images/gallery/slider2.jpg" alt="" data-transition="slideInLeft" title="This is an example of a caption" />
lly/slider3.jpg" data-thumb="images/gallery/slider3.jpg" alt="" title="#htmlcaption" />
lly/slider5.jpg" data-thumb="images/gallery/slider5.jpg" alt="" title="Fusion von Gestaltung und Programmierung" />

:lass="nivo-html-caption">
g> is an example of a <em>HTML</em> caption with <a href="http://www.anders.denkend.net">a link</a>.

..... -->
```

You can override a slides transition using the data-transition attribute:

```
="images/gallery/slider1.jpg" alt="" title="Andersdenkend presents" />
="images/gallery/slider4.jpg" alt="" title="Dreamland - One Page Portfolio" />
="images/gallery/slider2.jpg" alt="" data-transition="slideInLeft" title="This is an example of a caption" />
="images/gallery/slider3.jpg" alt="" title="#htmlcaption" />
="images/gallery/slider5.jpg" alt="" title="Fusion von Gestaltung und Programmierung" />
```

You can choose between 16 effects:

sliceDown, sliceDownLeft, sliceUp, sliceUpLeft, sliceUpDown, sliceUpDownLeft, fold, fade, random, slideInRight, slideInLeft, boxRandom, boxRain, boxRainReverse, boxRainGrow, boxRainGrowReverse

For more information to setup the slider visit:

[dev7studios.com](http://dev7studios.com)

You can only add images to the slider!

## 5. CUSTOMIZE THE PORTFOLIO

Portfolio thumbnails must be 202x136px. You find them under the path:

**images/gallery/image1\_tbn.jpg, image2...** Full size images can be any size.

To edit the category links in your portfolio navigation, rename the **data-tags**:

```
244     <li data-tags="Web Design">
245         <a class="foto" id="image1" href="images/gallery/image1.jpg" title="Music & Event Flyer - Around the World"
246           
247           Project Title
248         </a>
249     </li>
```

You can add as many categories you like separated by comma's.

For images use this parameters:

```
250     <li data-tags="Illustration">
251         <a class="foto" id="image2" href="images/gallery/image2.jpg" title="Music & Event Flyer - Rainy Night"
252           
253           Project Title
254         </a>
255     </li>
256     <li data-tags="Logo">
257         <a class="foto" id="image3" href="images/gallery/image3.jpg" title="Music & Event Flyer - Last Night a DJ saw"
258           
259           Project Title
260         </a>
```

For h264 videos use this settings:

```
268     <!-- h264 Video --> <li data-tags="Video">
269         <a class="video" href="http://www.youtube.com/watch?v=p9isboDgxMM" title="Barcelona by Albin Holmqvist"
270           
271           Project Title
272         </a>
273     </li>
```

For Websites, Flash and other Video formats:

```
310     <!-- Website --> <li data-tags="Web Design,Logo">
311         <a class="web1" href="http://graphicriver.net/user/andersdenkend/portfolio" title="Our Graphicriver Portfolio"
312           
313           Project Title
314         </a>
315     </li>
316 </ul>
317 </div>
318 <div class="qotop" >
```

## 6. SETUP THE E-MAIL FORM

To be able to receive the emails that are sent via the contact form, edit the php file you find under **php/mail.php** and edit the line 18 (your mail adress going there).

```
1 <?php
2 //declare our assets
3 $name = stripslashes($_POST['name']);
4 $emailAddr = stripslashes($_POST['email']);
5 $comment = stripslashes($_POST['message']);
6 $subject = stripslashes($_POST['subject']);
7 $contactMessage =
8     "Message:
9     $comment
10
11     Name: $name
12     E-mail: $emailAddr;
13
14     Sending IP:$_SERVER[REMOTE_ADDR]
15     Sending Script: $_SERVER[HTTP_HOST]$_SERVER[PHP_SELF]";
16
17 //send the email
18 mail('YourEmailHere@gmail.com', $subject, $contactMessage);
19 echo('success'); //return success callback
20 ?>
```

## 7. SETUP SOCIAL LINKS

We included the most popular social service icons under:

**images/social/**.

Place your links between ””

```
414 <strong>Website</strong>
415 <p><a href="http://www.anders.denkend.net">www.anders.denkend.net</a></p>
416 <div id="rightsocial">
417 <h1>Get Connected</h1>
418 <a href=""><img onmouseover="this.src='images/social/social_facebook_b.png'"
419 <a href=""><img onmouseover="this.src='images/social/social_twitter_b.png'"
420 <a href=""><img onmouseover="this.src='images/social/social_linkid_b.png'"
421 <a href=""><img onmouseover="this.src='images/social/social_behance_b.png'"
422 <a href=""><img onmouseover="this.src='images/social/social_dribble_b.png'"
423 <a href=""><img onmouseover="this.src='images/social/social_yahoo_b.png'"
424 <a href=""><img onmouseover="this.src='images/social/social_flickr_b.png'"
425 </div>
426 </div>
427 </div> <!-- end of Section Content Contact -->
428 </div> <!-- END OF CONTENT -->
429
```

The images with **\_b.png** naming are for the roll over effect.

```
'images/social/social_facebook_b.png' onmouseout="this.src='images/social/social_facebook.png' src="images/social/social_facebook.png"
'images/social/social_twitter_b.png' onmouseout="this.src='images/social/social_twitter.png' src="images/social/social_twitter.png" w.
'images/social/social_linkid_b.png' onmouseout="this.src='images/social/social_linkid.png' src="images/social/social_linkid.png" widt
'images/social/social_behance_b.png' onmouseout="this.src='images/social/social_behance.png' src="images/social/social_behance.png" w.
```

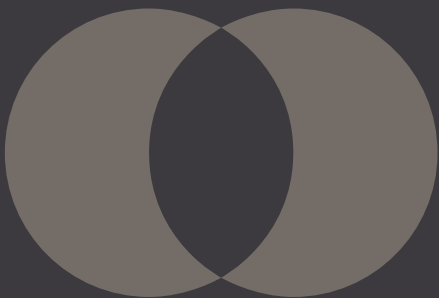

## 8. SCRIPTS & OTHER SOURCES

You can find more information about some of the used plugins & scripts under the following sites:

- JQuery by jquery foundation, visit the [homepage](#)
- Ajax contact form by Philip Beel, visit the [homepage](#)
- JQuery easing plugin by gsgd, visit the [homepage](#)
- Mousewheel plugin by Brandon Aron, visit the [homepage](#)
- Quicksand item filter by agilope, visit the [homepage](#)
- Mail Validation by Jörn Zaefferer, visit the [homepage](#)
- Nivo Slider by dev7studios, visit the [homepage](#)
- FancyBox by fancybox, visit the [homepage](#)

● A BIG thank you to all this great authors and contributors, without them this template wouldn't be possible!
